

Obtained B&C Coverage for a Publicly Traded Operator

The Challenge

One of the largest Publicly Traded MSOs had purchased Side A ONLY D&O coverage historically because B&C coverage was cost prohibitive and the retentions/deductibles were 5M+. They purchased 3M in Side A ONLY for 300K.

The Solution

We were able to source an option as follows:

- 1 Limit: 2.5M Side ABC
- 2 Retention: 2M (B&C ONLY)
- 3 Premium: 500K

We were able to provide coverage for securities litigation which was their largest exposure as a publicly traded company. They had plenty of cash on hand so Side A was less of an exposure than B or C.
